EcoLogo™ Program Listing

The Advantage ICF System® has developed a certification listing under the EcoLogo™ Program allowing us to apply the EcoLogo™ stamp of approval to Advantage ICF System labels and product information. Plasti-Fab recognizes that our products are key components in creating an energy efficient building envelope and see our listing under the EcoLogo Program as emphasizing our commitment to environmental responsibility in the manufacture and use of our products.

The EcoLogo Program is designed to reduce stress on the environment by encouraging the buying and selling of environmentally preferable products and services. To be certified under the program, companies need to demonstrate environmental management. A product is assessed on its total life cycle performance, which includes how a product is made, what it is made with, how it is used, what will happen when it is disposed of and its potential for being recycled.

The EcoLogo mark of approval on the Advantage ICF System provides scientific credibility and proof of environmental leadership. The EcoLogo mark provides customers – public, corporate and consumer – with assurance that the products bearing the logo meet stringent environmental standards that have been verified by a third party auditor. The illustration below indicates how the logo is used on our products.

The words above and below the EcoLogo™ identify the EcoLogo Program Certification Criteria Document that was used to establish compliance with the program requirements.

EcoLogo is currently the only North American eco-labelling program approved by Global EcoLabelling Network (GEN), an association of third-party environmental performance labeling organizations dedicated to improving and promoting the eco-labelling of products and services. The EcoLogo is approved by GEN as meeting the internationally recognized ISO 14024 requirements for environmental labels and declarations.
