CCMC Evaluation Listing 12425-L - Plasti-Fab CAN/ULC-S701, Type 2 Products

Canadian Construction Materials Centre (CCMC) evaluation listings provide a convenient means of demonstrating compliance with CAN/ULC-S701 and the National Building Code of Canada 2010 (NBC) for a variety of insulation applications. CCMC evaluations are made available to code officials, contractors, specifiers, architects, engineers, and anyone else with an interest in the building industry and construction.

CCMC **Evaluation Listing** 12425-L confirming compliance with CAN/ULC-S701-11, “**Thermal Insulation, Polystyrene, Boards and Pipe Covering**”, Type 2 can be downloaded directly from the Plasti-Fab Technical Library at: http://www.plastifab.com/pdf/technical-library/tech-code-support/plastifab/12425_e.pdf or from the CCMC Registry of Product Evaluations at: <http://www.nrc-cnrc.gc.ca/eng/solutions/advisory/ccmc/evaluations.html>.

Refer to CCMC Evaluation Listings 12424-L (PIB 267) for Plasti-Fab insulation meeting or exceeding CAN/ULC-S701, Type 1 and 12426-L (PIB 296) for Plasti-Fab insulation meeting or exceeding CAN/ULC-S701, Type 3.

For additional information on recognition of CCMC evaluations, see Plasti-Fab Product Information Bulletin 207.
